

# ENDOVASCULAR DILATOR SET

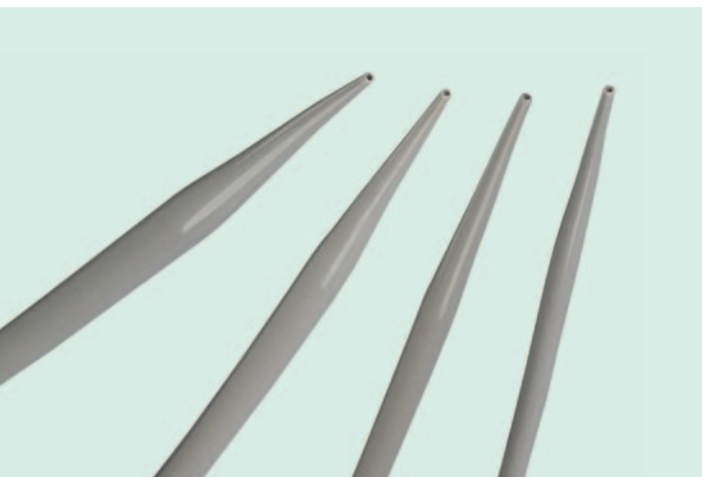

Expand your dilation options.

An Accessory for Endovascular Procedures

# ENDOVASCULAR DILATOR SET

Dilators are used to pre-dilate abnormal iliac arteries that must be navigated for the delivery and deployment of endovascular devices. Designed with hydrophilic-coated, long-tapered dilator tips that provide excellent over-the-wire trackability, the dilators of the Endovascular Dilator Set have a new standard length of 45 cm in addition to five new French sizes, giving you more options for your dilation needs.

## Additional French Sizes

The Endovascular Dilator Set now comes in seven different sizes, from 14 to 26 Fr, providing options to help accommodate a wide range of anatomies and EVAR case needs. Except for the stand-alone 14 Fr size, the dilators come in sets of two (16/18, 20/22, 24/26) to help with cost containment.

## Increased Length

At the request of physicians, the length of the dilators that make up the Endovascular Dilator Set has been increased from 30 to 45 cm to reach the aortic bifurcation. Along with the hydrophilic coating, this increase in length helps make the dilators the ideal solution for your endovascular dilation needs.

Global Product Number	Order Number	Accepts Wire Guide Diameter inch	Fr	Length cm	Hydrophilic Coated
G52833	JCDS-14-EDS-HC	.035	14.0	45	yes
G52834	JCDS-1618-EDS-HC	.035	16.0, 18.0	45	yes
G52835	JCDS-2022-EDS-HC	.035	20.0, 22.0	45	yes
G52836	JCDS-2426-EDS-HC	.035	24.0, 26.0	45	yes
