Guardia™ Access

CURVED EMBRYO TRANSFER CATHETER

The Guardia Access Curved Embryo Transfer Catheter is designed to allow controlled placement of in vitro fertilized (IVF) embryos into the uterine cavity.

The atraumatic bulb tip eases passage through the cervix, and the precurved guide catheter facilitates insertion of the transfer catheter. Microvol™ technology is designed to reduce the volume of medium that is required for embryo transfer.

The Guardia Access Malleable Obturator is used to help access the uterus with the curved guide catheter.

Order Number	Reference Part Number	Guide Catheter OD Fr	Guide Catheter Length cm	Transfer Catheter OD Fr	Transfer Catheter Length cm	Guide Catheter Hub Type
Guardia Access Catheter
