

# Gain ductal access when ERCP is not an option.

## EchoTip<sup>®</sup> Ultra

HIGH DEFINITION ULTRASOUND ACCESS NEEDLE

When you must access the pancreatobiliary system but the case is too challenging for ERCP, you need an innovative alternative. And that's exactly what you get with Cook's High Definition Ultrasound Access Needle – the first therapeutic EUS needle indicated for gaining access. It has the patented, highly echogenic HD pattern that is standard for all our EchoTip Ultra EUS devices, which means you can more adequately assure the needle is within the target. And you'll experience procedural stability and security thanks to an ergonomically enhanced handle with integrated sheath adjuster.
