

Achieve percutaneous biliary access and perform transluminal forceps biopsy with one efficient set.

Flexible biliary biopsy forceps in open position.

TRANSLUMINAL BILIARY BIOPSY FORCEPS SET

Efficient

Establish percutaneous access for drainage procedures and for transluminal forceps biopsy of biliary strictures in a single, efficient procedure.

Effective

Use a novel technique to maintain access with the wire guide beyond the biopsy area. The Flexor® sheath's position against the stricture allows the forceps to penetrate more deeply for a reliable and accurate sample.

Complete

Obtain a comprehensive and convenient array of set components that feature the following technologies: EchoTip® needles for visibility, the Aprima™ Access set for smooth entry into the biliary tree, and biopsy forceps that are ideally suited for sampling.

TRANSLUMINAL BILIARY BIOPSY FORCEPS SET

- The forceps are designed for single-handed operation, which allows your free hand to maintain control of the Flexor sheath.
- The set includes all of the components you need to access the biliary tree for transluminal biopsy.
- Cook Medical's separate, complementary line of biliary drains and stents allows you to complete the procedure according to your preference.
