

Collect EVAC™

BLADDER EVACUATOR

SELF-AIR-PURGING DESIGN

Allows efficient and rapid tissue evacuation

SECURE BULB

Easy to squeeze and purge while remaining securely attached throughout the procedure

ADAPTABLE CONNECTION END

Easy, watertight connection to virtually any resectoscope

LOCKING MECHANISM

Airtight seal prevents risk of fluid or tissue loss and maintains suction pressure

REMOVABLE COLLECTION BASKET

Eliminates need for tissue straining while reducing risk of personnel exposure to blood and bodily fluids

A simple solution for tissue collection.

Collect EVAC™

BLADDER EVACUATOR

A simple solution for tissue collection.

The Collect EVAC is designed to perform dual irrigating and tissue straining/collecting functions during transurethral bladder and prostate surgery. The Collect EVAC is a completely secure system that locks in tissue samples and eliminates the risk of fluid loss or contamination.

The unique collection unit traps tissue samples, eliminates the need for tissue straining and allows for a clean and simple transfer to a pathology specimen jar. This controls cross-contamination, tissue loss and associated risk of exposing personnel to blood and bodily fluids. The Collect EVAC bladder evacuator is disposable and latex free.
