**Identify potential risks earlier in pregnancy.**

# CHORIONIC VILLUS SAMPLING SET

The CVS (Chorionic Villus Sampling) Set facilitates the collection of placental tissue to help detect the presence or absence of particular genetic disorders at an earlier stage than amniocentesis. Available only from Cook Medical, the CVS Set helps physicians obtain chorionic villi transcervically for the purpose of prenatal diagnosis of genetic abnormalities during weeks 10-12 of pregnancy.

- Updated, injection-molded, ergonomic handle allows for greater mobility.
- Echo-Tip® stylet increases visibility under ultrasound.
- Flexible catheter minimizes trauma to surrounding tissue.
- Catheter is constructed of nonradiopaque polyethylene.
- Intended for one-time use only.

Cook Medical—Developing simple solutions for women’s health.
