

Guardia™ Obturator

ADJUSTABLE OBTURATOR

Experience versatile control during transfer.

The Guardia™ Obturator has been specially designed with an ergonomic handle to help physicians gain better access to the uterus during the embryo transfer process. This universal obturator works with the following Cook catheters: Guardia AccessET, Pivot, Soft-Pass™, Soft-Trans, Microvol™ and Sydney IVF. It has also been tested and confirmed to fit precisely into a number of other embryo transfer catheters.

A smaller, 2.8 Fr version of the obturator works with the Guardia Pro and other similar-sized catheters. See the model chart on the reverse for more information.

The Guardia Obturator is available in two styles: malleable or stiff. The malleable obturator contains flexible wire that can be formed to match the curvature of the female anatomy. The stiff version allows additional control in cervixes that present greater difficulty.

Cook Medical—Simplifying procedures for patients and clinicians.

FEATURES AND BENEFITS

- Works with a variety of Cook Medical catheters.
- Fits a number of other embryo transfer catheters.
- Adjustable and locks into place for greater precision.
- Soft material lessens endometrial trauma.
- Available in malleable and stiff.
